About us

In 2009, we launched a group of projects (Stars Tower) in the most vital areas (Kafr Abdo – Smouha – Ibrahimia – Roushdy – Saba Basha), in which we have been executing construction and finishing work.that added a lot of developments. Additionally, it provided the highest level of luxury and finishing quality.

Moreover, our work precedent in real estate development is presented before founding the contracting company in 2019.

EGY BUILDERS was established in 2019 as the general contracting arm of its sister company, Groupa Real Estate Development company.

EGY BUILDERS specializes generally in turn-key building construction projects, executing from foundation works to concrete skeleton works and general, all grades, finishing works.

However, the company's strength and true specialism lays in its state-of-the-art high-end luxurious special finishes and decoration division, with such works executed for large and reputable Clients as well as personal private villas, swimming pools, land scaping works and buildings in general.
